

That's a GREAT QUESTION! Why should YOU care. Maybe you don't have kids, maybe your kids are grown, maybe you think "professionals" have kid's best interests in mind, or maybe you think, heck I survived, kids these days will too.

Well to be frank, it is that kind of reasoning for one of the reasons our kids are so confused. We should want MORE for our kids, even if we don't have any. It is the responsibility of society to protect their young.

[Medical](#) and psychological experts agree: Early sex and sexual experimentation is dangerous and [harmful](#) to children. Sex ed based on risk-reduction (rather than avoidance) [increases](#) the risky behaviors it claims to prevent. Gender ideology is [harmful](#) to children, who are just developing their identities, as it separates them from biological reality. The results of all of the above include STDs, abortion, susceptibility to trafficking and abuse, and severe mental health outcomes, including suicide. Comprehensive sexual education *has clearly been ineffective*, with 80% of the programs studied under the Obama-era Teen Pregnancy Prevention program having [no or a negative effect](#) despite hundreds of millions in taxpayer funding. Sexual risk avoidance (abstinence-focused) programs show [promising results](#).

Experts agree, early sex and sex experimentation is harmful and even dangerous to our children. CSE, (comprehensive sex ed) which is based on RISK reduction, INCREASES the risky behaviors, giving a false sense of security.
